Moldova within the European Union**

Manifesto: Building a Prosperous Future for Moldova within the European Union

We, the members of the Partidul Politic "Alianța Liberalilor și Democraților pentru Europa", believe in a future where Moldova thrives as a prosperous, independent, and unrestricted state within the European Union. Our vision is grounded in democracy, the Rule of Law, and a solid commitment to European integration.

1. European Integration

Membership in the EU offers us a path to stability, economic growth, and access to a larger market for our goods and services. We will work tirelessly to accelerate harmonizing our legislation, institutions, and practices with EU standards and finally meet the 'Copenhagen Criteria.

We advocate for Moldova's active participation within the European Union while safeguarding its sovereignty:

- Striving for an influential Moldovan presence within EU institutions, ensuring Moldova's interests are heard and respected.
- Supporting Moldova's right to make sovereign decisions within the EU framework while upholding European values and commitments, preserving the Moldovan territorial integrity.

2. Economic Prosperity

We believe that a thriving economy is essential for the well-being of citizens. To achieve that, we promote a liberal economic agenda with solid support for entrepreneurship, innovation, and fair competition. We aim to reduce bureaucracy, lower taxes, and create a business-friendly environment that attracts local and foreign investments. A long-term effect of it is the reduction of unemployment and the eradication of poverty in Moldova.

To ensure that, we support the necessary reforms against monopolies and State intervention, as stated by the European Union Competition Policy.

3. Rule of Law and Justice Reform

We shall strengthen the Rule of Law and ensure that justice is accessible, transparent, and impartial. We will reform the judiciary to guarantee the independence of our legal

system. We aim to eradicate corruption and improve property rights enforcement. Protecting human rights, including those of minorities, will be the core of our legal system.

We recognize that the only way to secure justice and freedom is the separation of powers and institutions that act as safeguards to ensure that.

4. Education and Innovation

We recognize that education is the cornerstone of a prosperous society.

We will reshape and invest in our educational system to ensure that Moldovan students receive a world-class education, even from the pre-school year.

We will foster innovation and support research and development initiatives at our universities to keep pace with the evolving global economy and make it to the global rankings.

6. Sustainability: Environmental and Cultural

We are committed to preserving Moldova's natural beauty and ensuring a sustainable future for our environment. We will promote policies that address environmental challenges, encourage renewable energy sources, and protect our precious natural resources.

We believe the energy market is an asset and a strategic cornerstone of a nation's sovereignty, social cohesion, and sustainable development. We work on a compelling campaign to press the government into action. We assert that the national gas company, owned by Gazprom, should be restructured as it poses a liability, clearly demonstrated during the current energy crisis. Collaborate with us to safeguard our energy future.

We promote and preserve Moldova's rich cultural heritage while embracing European values and diversity. We facilitate cultural exchanges and cooperation with European partners to foster mutual understanding and appreciation.

7. Transparency and Accountability

We pledge to maintain the highest standards of transparency and accountability in the government. We will introduce measures to combat corruption, enhance government efficiency, and ensure that public funds are used responsibly and for the benefit of all citizens.

In our quest for transparency and responsible governance, we are committed to monitoring and improving the efficiency of international financial support.

Our team of experts diligently prepares reports on government administration failures related to external funds, project delays, and mishandling of international funds. Join hands with us to identify problems, responsible decision-makers, and practical solutions in international finance.

Over the last months, we led an undercover operation, alongside intelligence services and anti-corruption prosecutors, to expose a nefarious network of political funding originating from laundered Russian money orchestrated by the fugitive oligarch Ilan Shor. We invite partners who share our passion for clean politics to join us in this fight for fairness.

8. International Justice and Accountability

We stand unapologetically firm in our pursuit of justice in Eastern districts. We demand accountability from the Russian Federation for its military occupation on the left bank of the Dniester in the Transnistrian region. This occupation has created a separatist, unrecognized administration, violated human rights, and plundered the region's economy since 1992. We insist on withdrawing Russian military forces and compensation for the economic damage inflicted.

We will assess the economic damage and demand compensation from the Russian Federation.

We believe in the active participation of citizens in the democratic process. We will engage with the civil society, encourage citizen involvement in decision-making, and create channels for feedback and collaboration between the government and the people.

In conclusion, we envision a Moldova where every citizen can pursue their dreams, enjoy their freedoms, and benefit from the opportunities offered by European integration.

We invite all like-minded individuals to join us on this journey towards a liberal, prosperous, and European Moldova. Together, we can build the future we all aspire to achieve. Moldova's European destiny is within our grasp, and we are ready to seize it.
